- Managed administrative and academic responsibilities to improve student outcomes.

EDUCATION

Trimex Colleges - B.S. in Information Technology

Sep 2012 – Jun 2016

Philippines

PROJECTS

- **CloudBanking:** An online accounting solution for managing invoices, expenses, procurements, and payments. Inspired by platforms like XERO, QuickBooks, MYOB, and ConnectWise.
- **Intranet:** An internal platform for employee management, developed for Metavurx.
- **Weather App:** A simple weather website that uses the OpenWeather API to display the current weather, 3-day forecasts with hourly breakdowns, and weather alerts.
- **Simple Login:** A user authentication system built with Laravel as the backend and Vue.js as the frontend. It uses Laravel Sanctum to implement secure, cookie-based session authentication. The application is deployed on AWS, and the Vue.js frontend communicates with the Laravel backend via API calls to handle login, logout, and authentication features.
- **AI Chatbot:** Developed a personalized chatbot using OpenRouter AI, integrated with custom data and portfolio content for tailored user interactions.
